Folding Instructions:
Place on a flat surface with this text facing you. Now simply fold the sheet so that like numbers connect face to face. For example, when you connect the number ① on the right with number ① on the left, you automatically create a fold from top to bottom. Connect all the numbers, front and back.

①

①

Staple here when finished.

Use two instances of your chosen image, align with one image behind.

Using the cropping tool on the picture tool bar, crop the top image in half. Crop the bottom image in half the opposite direction.

Print the first two pages back to back (do not print this page). The folding lines will not print to the edge because of the limitations of printers, however enough will be printed so as not to cause problems in the folding process.

This publication can be used as an advertisement for your church, business or social organization. It is a simple project for older children.
